

Faculty Development Program in Project Management

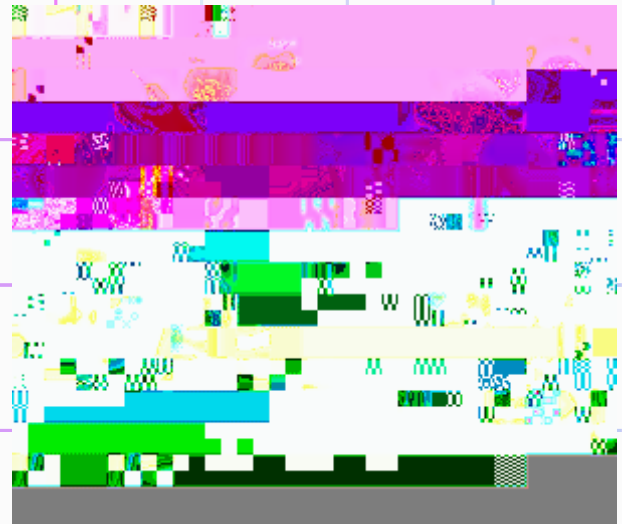

Learn the Creative Pedagogical Approaches to teach Project Management

11-15 February, 2015, NITIE, Mumbai

Introduction

“One of the greatest influences in student’s life is by their college faculty. It is thus important to develop faculty capabilities in a way that will help them to deliver value to students/professionals by making the teaching/learning process more engaging.”

Project Management is becoming an important field of study. In recent years, it has been drawing attention from various quarters including government and across industry sectors. Project Management is largely practice driven, however over the years it has evolved beyond the concepts of planning & scheduling (CPM & PERT) to now an integrated approach drawing knowledge from different management functions. Time & cost management has largely been the focus till recently. However, other aspects of projects such as Risk Management, Stakeholder Management, Project Execution, Monitoring & Control etc. are being recognised as important for the success of any project.

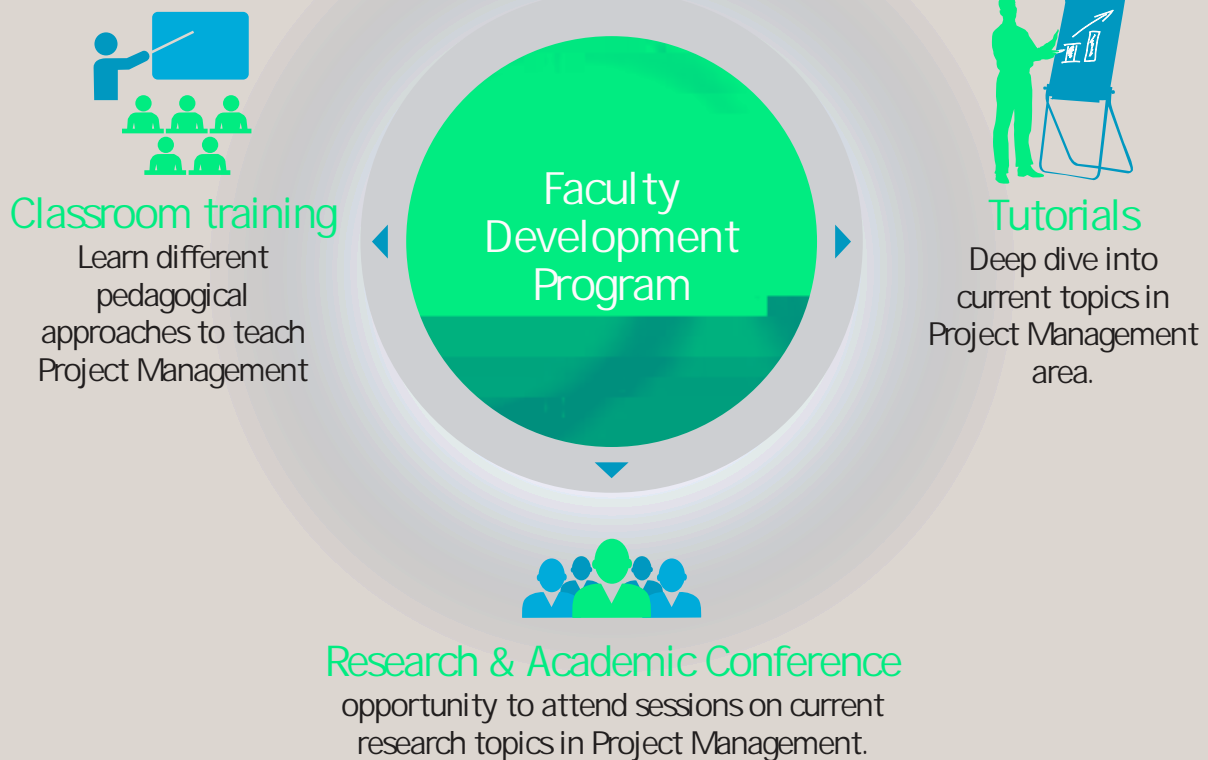

There are a host of topics that need to be delivered to the students/professionals in the field such as Project Feasibility studies, Scope Management, Cost Management, Time Management, Quality Management, Human Resource Management, Materials Management, Project controls, Value Engineering, Contracts Management, Project Risk Management, Communication & Stakeholder Management and the use of Project Management Software.

The challenge for faculty teaching the above topics is to make them interesting to the students and professionals attending their programs. Hence, they need to adopt innovative ways of teaching project management.

Objective of the Program

The objective of this Faculty Development Program is enable faculty to develop an understanding of the different pedagogical approaches and adopt the most suitable approach to teach different topics in project management over and above the conventional approach of lecture teaching, use of computers/software to make classroom more engaging and interactive for the students. The program has been designed by expert faculty from NITIE and the PMI India Academic Advisory Group.

The FDP program has 3 core components

Coverage

The FDP will broadly address the following

- Overview of Project Management – A broad perspective of the entire spectrum of topic to be covered in project management along with challenges associated with teaching these topics
- Different Pedagogical approaches– Each topic can be taught by complementing the theoretical concepts using one of the following approaches viz., Case based Teaching, Use of Videos, Adopting role play, Simulation/games, and Live projects
- Deep dive into Contemporary topics through focussed workshops on System dynamics, Complexity in Project Environment, Project simulation & planning and Project Risk Management.
- Exposure to Current Research areas/topics in the field of project management.
- Developing the teaching and research plans.

Note: All registered participants will get a participation certificate at the end of the course.

Program details

Duration - 5 days, 11-15 February 2015
Venue - National Institute of Industrial Engineering (NITIE), Vihar Lake Road, Mumbai – 400 087

Who should attend?

- ▶ Faculty from management institutions teaching Project management, Operations Management, and other related areas which have a strong focus on applications of project management.
- ▶ Faculty from Production Industrial Engineering, Civil/Mechanical/Electrical and Electronics Engineering, Information Technology departments who teach project management to graduate / post graduate level students.

Registration Procedure & Fee Details

- Fill and submit the online form/mail hard copy [Click here](#) to access form.
- Registration forms should be submitted through Head of Department/Head of Institution
- Shortlisted applicants will receive notification
- Participation will be confirmed only if the registration fee is paid before the stipulated time
- Limited seats (max 30)
- Registration fee Rs 9,000 (inclusive of FDP program, Breakfast/Lunch/Dinner & the participant kit)
- Stay at NITIE MDP Hostel (5 nights) on twin sharing basis Rs 5,000 (optional & subject to availability)
